

Tool Specifications for Katadyn Rapidyn Filter Kit

Bucket

Buckets are not included in the Katadyn Rapidyn Filter Kit. The following specifications must be taken into account when sourcing buckets:

Material	Food Grade Plastic or Material for drinking water contact (for example: dried food bucket) other plastics or material could release contaminants to the drinking water like plasticizer, heavy metal or nano particles. It must be possible to drill a hole into the lower bucket for the tap and into the upper bucket for the filter element. Transparent is not recommended as the bacteria will grow faster
Dimensions	Round or angular shaped, inside diameter: min. 270mm
Volume	Min. 10l (volumes below 10L are mostly too small for the Rapidyn Filter Element)
Design	The buckets must have a lid and must be stackable after assembly

Step Drill

A step drill is included in the MOQ of 600 pieces but not in sample shipments. If a step drill is needed for testing the samples, the following specification must be considered:

Material	Multistepdrill 4, 6, 8, 10, 12, 14, 16, 18 & 20mm Diameters
